

## Oregon Tech Alum Support

The Construction Management program is supported by alumnus Bill Dutra (Civil Engineering Technology Class of 1971), Executive Chairman and founder of The Dutra Group, who serves as a program champion.

The Dutra Group is an organization with over five decades of experience in marine dredging, construction and materials.

## Build Your Future and THE Future

The Bachelor of Science degree in Construction Management, with options in Heavy Construction and General Construction, at Oregon Tech offers a comprehensive education that equips you with the skills needed to excel in the dynamic construction industry. Whether you are overseeing large-scale infrastructure developments or managing residential projects. You will engage with both the theoretical foundations and practical applications of construction from your very first year. This hands-on experience grows in complexity as you progress, preparing you for immediate employment and allowing you to explore specific career paths within the diverse field of construction management.

A bachelor's degree, as well as a minor, in Construction Management from Oregon Tech provides practical, hands-on experience in project planning, cost estimation, safety management, and sustainable building practices while fostering essential teamwork, leadership, management, and communication skills.
